

Alternate Method for Joining the Online Tape Group from your iPhone or iPad

If the standard method for joining a meeting does not work for your device, use this alternate method. In this method, you connect to the meeting directly through the Webex Meeting app. Before you begin, **be sure that you have copied the meeting number** from the “Join A Meeting” page of the website.

1. Open the “Webex Meet” app on your iPhone or iPad.

If you do not have this app on your device:

- a. Open the *Apple App Store* app.
- b. Search for “Cisco Webex Meetings”
- c. Tap on “Get.” The app will download. (It’s free.)
- d. Open the app after it downloads.

2. Tap the green “Join Meeting” button.

Join Meeting

The “Join Meeting” page appears:

A screenshot of the Webex Meet "Join Meeting" page. The page has a white background with a grey header. The header contains "Cancel" on the left, "Join Meeting" in the center, and "Join" on the right. Below the header is a text input field labeled "Meeting Number or URL". Below this field is a note: "If you are invited to a Personal Room, you can enter the URL" followed by the example URL "company.webex.com/meet/username". Below the URL field are two more text input fields labeled "Your name" and "Email address". Red circles and arrows highlight the "Join" button and the "Meeting Number or URL" field.

3. Enter the **meeting number** (no spaces needed). If your name and email address are not already filled in, enter them.
4. Tap “Join” at the top right of the page. You will be connected to the online tape group session. *(continued on next page)*

5. The app might automatically connect you to the audio for the session, or you may be given a choice for audio connection. If you have a choice, select the “**Call via Internet**” option.
